

ASQ CRE Prep course

Module 7

VI. Maintainability
and Availability

Reliability & Maintenance

A photograph of a busy city street at dusk. In the foreground, a blue sports car is driving away from the camera. To its left, a silver minivan is also driving away. Further ahead, several other cars are visible, including a silver sedan and a dark car. The street is lined with tall buildings, and the sky is a mix of orange and blue. A white arrow on the road points to the left, and a white bicycle symbol is painted on the pavement. The text "Maintenance Engineering" is overlaid in a white serif font at the bottom of the image.

Maintenance Engineering

It about our approach
